CASE MANAGEMENT

A proactive approach of care that focuses on those people with the most complex conditions.

It involves care coordination and planning by a case manager/consultant

Dependent on clinical needs of the patient's/associated carers' need.

Increased patient's quality of life through a personalized care plan.

Community Plan

'Through the unique combination of
comprehensive assessment, proactive clinical
intervention, marshalling of resources,
assessment of the quality of care and
co-ordination of primary and social
care, enable people with long term conditions
to remain in control of their own lives'.
